

Environments, Societies, and Histories in East Asia Lecture Series

NICHE

THE NEW INSTITUTE
Centre for Environmental
Humanities

Ca' Foscari
University
of Venice

Department of Asian
and North African Studies

This series of lectures presents topics on the environments of East Asia from a historical perspective with a focus on human and natural resources (water, forestry, agriculture, transportation, human displacements...). The series stems from the urge to go beyond the limits of imperial/national history and to observe how different East Asian societies and regional entities dealt with human and natural resources from the premodern period to the present day. From a social standpoint, we aim at enabling the potential of Asian environmental histories to inform the quest for just and sustainable futures.

4 APRIL, 2.00 PM (online)

Ling Zhang

Boston College

**Geoengineering an Empire.
The Consumptive Mode of Analysis and
China's Medieval Economic Revolution**

29 APRIL, 3.30 PM (online)
